SUMMARY

Senior Software Engineer with 8+ years of experience building scalable, cloud-native enterprise applications across federal and commercial environments. Expertise in microservices architecture, backend API development, secure authentication systems, CI/CD automation, and modern frontend frameworks including Angular and TypeScript. Hands-on experience delivering distributed systems using Azure, AWS, Java, Spring, and .NET technologies while collaborating in Agile engineering teams to improve scalability, reliability, and deployment velocity. Certified Azure Solutions Architect with a strong track record of driving modernization initiatives, improving operational efficiency, and mentoring high-performing engineering teams.

PROFESSIONAL EXPERIENCE

Senior Software Developer at ICF International, Reston VA January 2022 – June 2025

- Designed, developed, and deployed 10+ cloud-native applications and services supporting U.S. Forest Service systems, improving scalability, deployment frequency, and operational reliability across mission-critical applications.
- Architected and launched a multi-agency Special Projects Database serving federal stakeholders, eliminating 7,000+ annual manual submissions and reducing approval processing timelines by 40%, significantly improving operational transparency.
- Built secure RESTful APIs and distributed backend services using modern object-oriented frameworks and microservices design principles.
- Implemented CI/CD automation pipelines across 5+ services using Azure DevOps and Jenkins, reducing deployment risk and accelerating release cycles by 30%.
- Designed and governed secure service architectures using OAuth2, JWT, and SSO authentication, ensuring compliance and improving platform-wide security posture.
- Contributed to automated testing strategies and quality-focused engineering practices across frontend and backend systems.
- Improved production reliability through centralized monitoring, structured incident response workflows, root-cause analysis, and proactive system observability improvements.
- Collaborated closely with product owners, QA engineers, architects, and developers in Agile sprint cycles, participating in code reviews, backlog refinement, and technical planning sessions.
- **Environment:** .NET Core, Angular, MS Azure, MS SQL Server, JavaScript, Datadog

Software Developer at Creative Systems and Consulting LLC, Reston VA October 2019 – December 2021

- Designed and delivered scalable web applications and dashboards supporting federal business operations, improving frontend performance by 25% across high-traffic systems.
- Partnered with UX and product stakeholders to design extensible frontend and backend architectures supporting high-traffic federal systems.
- Contributed to engineering quality through code reviews, architecture discussions, and secure coding best practices.
- Served as senior technical interviewer for full-stack and cloud engineering candidates.
- **Environment:** Java, Spring, .Net Core, jQuery, MS SQL Server, JavaScript, AWS

Full Stack Developer at MJobTime Corporation, Beaumont TX January 2019 – October 2019

- Developed modular workforce management and HR systems improving operational efficiency and customer satisfaction.
- Designed algorithm-driven time tracking and incident management workflows, reducing issue resolution time by 30%.
- Refactored legacy components to improve scalability, maintainability, and application performance.
- **Environment:** ASP.Net, Sybase, JavaScript, Bootstrap, jQuery, MS SQL Server

Software Developer at MJobTime Corporation, Beaumont TX February 2018 – August 2018

- Built real-time labor tracking features supporting multi-time-zone accuracy and high-volume transactional systems.
- Modernized HR workflows by redesigning employee management modules for improved scalability and maintainability.
- **Environment:** ASP.Net, Sybase, JavaScript, Bootstrap, jQuery, MS SQL Server

TECHNICAL SKILLS

- **Languages:** Java, C#, JavaScript, TypeScript, Python, SQL
- **Backend & APIs:** Spring, Spring Boot, ASP.NET Core, REST APIs, Microservices, Distributed Systems
- **Frontend:** Angular 8+, JavaScript, TypeScript, HTML5, CSS3
- **Cloud & DevOps:** Azure, AWS, Jenkins, Azure DevOps, CI/CD, Docker, Kubernetes, Git, SonarQube
- **Databases:** SQL Server, MySQL, PostgreSQL, Sybase
- **Security:** OAuth2, JWT, IAM, SSO, OWASP Secure Coding Practices
- **Engineering Practices:** Agile/Scrum, Code Reviews, API Design, System Modernization, Monitoring & Observability, Performance Optimization
- **AI-Assisted Development:** LLM-based prototyping, test generation, documentation automation

CERTIFICATIONS

- Microsoft Certified: Azure Solutions Architect Expert (2025)
- AWS Solutions Architect – Associate (2023)
- CompTIA Security+ (in-progress)

EDUCATION

- | | |
|---|-----------------------------|
| • Master of Science in Computer Science
Lamar University, Beaumont TX | August 2016 – December 2018 |
| • Bachelor of Technology in Computer Engineering
Sardar Vallabhbhai National Institute of Technology, India | August 2010 – May 2014 |
